PCN Title: Notification of Wafer Fab Location Change for 0.35 BCD Process

Publication Date: 24-May-2021

Effectivity Date: 26-Aug-2021 *(the earliest date that a customer could expect to receive changed material)*

Revision Description:

Adding the following part numbers to the PCN.

LTM2884CY#3OLPBF

LTM2884CY#PBF

LTM2884HY#PBF

LTM2884IY#PBF

Description Of Change:

ADI is transferring all products currently manufactured using the 0.35micron BCD process at the wafer fab facility located at 275 S. Hillview Dr., Milpitas, CA, USA to Vanguard International Semiconductor, Taiwan. See Appendix A for the list of affected part numbers. The affected products will be manufactured using ADI specified manufacturing flows, materials, process controls, and monitors ensuring no degradation of quality and reliability performance. No new products are being released in the Hillview wafer fab and all affected products will be transferred to the Vanguard wafer fab by the end of May 2021.

Reason For Change:

As part of ADI's overall manufacturing strategy, ADI has decided to close the Hillview wafer fab facility. Vanguard has been a successful wafer fab foundry partner for ADI, and this business expansion will ensure continuity of supply to our customers well into the future. Vanguard International Semiconductor third party certifications and capacity details are attached for your review. Additional information can be found at <http://www.vis.com.tw>.

Impact of the change (positive or negative) on fit, form, function & reliability:

The qualification of the Vanguard International Semiconductor consisted of 1,000 hours of op-life testing, temp cycle, highly accelerated stress test, autoclave, and 1,000 hours of bake at 150°C, and precondition. The initial products have passed AEC-Q100 Qualification testing. The devices have been characterized over the full operating temperature range and have been subjected to ESD testing and latch up immunity testing. The devices have been found to meet the ADI data sheets. Additionally, devices from Vanguard International Semiconductor were carefully compared to the ADI fabricated devices to ensure identical performance when installed in customer applications. Reliability test results are attached.

Product Identification *(this section will describe how to identify the changed material)*

The devices manufactured in Vanguard International Semiconductor will have the same part number and the same top mark as those manufactured at ADI. However, when necessary we can use our lot number traceability system to identify where and when a device was fabricated.

Summary of Supporting Information:

Qualification has been performed per AEC-Q100, Stress Test Qualification for Integrated Circuits. See Attachment #1 for Qualification results.
